

## Social Class Autobiography Examples

Example 1: I was born into a middle-class family in the suburbs of Baltimore, Maryland. My parents both worked hard to provide my siblings and me with a comfortable life. We never had to worry about money since there was always enough for food, clothing and other basic necessities. Growing up, I enjoyed the stability that came with our financial situation, but I also understood the importance of hard work and that money wasn't something one could always rely on. As an adult, I have been able to maintain a job with a steady income, enabling me to stay in this same social class.

Example 2: I was born into a wealthy family in Beverly Hills, California. My parents had a very successful business and my siblings and I were able to enjoy all the luxuries that came with their success. We had access to private schools, lavish vacations, and designer clothing. Although I was thankful for my privilege and comfortable lifestyle, I understood early on that it wasn't something I could take for granted. As I got older, I made sure to take advantage of the resources and opportunities available to me, eventually leading to my own success in business. I've been able to build on my privileged upbringing and maintain a wealthy lifestyle as an adult.

Example 3: I was born into a working-class family in rural Ohio. My parents both worked multiple jobs to make ends meet and we had very little money for luxuries. Growing up, I learned the value of hard work and making sacrifices in order to provide for my family. Despite our limited financial resources, I was able to attend college on a full scholarship and eventually moved away from home to pursue my career. Although I still struggle financially, I've been able to build a better life for myself than my parents had and maintain a working-class lifestyle.
