

Essay About Women's Rights

There are many people who support the idea of social justice and its importance in this world to maintain both diversity and equality in order to maintain moral balance. Social justice is defined as “the equal distribution of resources and opportunities, in which outside factors that categorize people are irrelevant” (Pachamama Alliance). The word “equal” truly stands out in this definition. In this country, we stand for equality and diversity. It is a country whose moral intent is to have everyone treated fairly among peers, where they do not need to feel different. If social justice goes unnoticed, or worse unaddressed, it has the potential to create chaos throughout the world.
